

Course Description

This course introduces the assessment of sensory processing disorders and applies this knowledge to treatment approaches. The course includes case examples for group discussion and active participation for hands-on therapy techniques.

Course Audience: SLP, SLP-Asst, PT, PTA, OT, COTA

Course Objectives

Upon successful completion of this course, participants will be able to:

1. Develop and understanding of Sensory Processing Disorders, including the 3 Primary Patterns and Subtypes
2. Implement assessment and treatment techniques for improved treatment outcomes
3. Utilize expanded therapeutic problem solving skills to better enable clients and their families to be successful in meeting daily challenges
4. Develop and implement sensory diet strategies for treatment and home programs
